Military MCO Capabilities

We Support

*The largest Aircraft Manufacturers,
Airlines and MRO Centers*

Maximizing our OEM equipment life at
the highest performance and reliability.

No one knows its products better than the manufacturer

Our OEM expertise in design and our industrial excellence
allow Crouzet Services to ensure certified repaired units
conforming original equipment at the latest standard.

160+ Customers trust Crouzet Services

With 1,000+ Pilot & Flight Control Equipment Repairs Each Year:

AIRBUS

- › A320 family
- › A330 family
- › A350
- › A380
- › A340

BOEING

- › 757
- › 767

EMBRAER

- › Legacy, Praetor

DASSAULT

- › Falcon F2000,
900, 50
- › Falcon 7X, 8X

GULFSTREAM

- › G200, G280

MHI › CRJ

DHC › Q400

SAAB › 340, 2000

DORNIER › 328

Discover Our Spares Service

To support aircraft operations, Crouzet **keeps inventory** during the whole Aircraft Program Life in different locations around the world, collaborating with specialized **distribution partners** and **using only original components**.

This distribution service is also proposed to Airlines with short delivery lead-times.

***Whenever and wherever you need support to keep you flying,
We are there for you***

- ✓ Global distribution network
- ✓ Exchange spares inventory
- ✓ Recertified and new replacement equipment
- ✓ Original components specified by Crouzet
- ✓ Inventory program for obsolescence management
- ✓ Inventory planning & AOG Service available upon request

Sensors

INSTRUMENTATION

We integrate thousands of strain gauges to measure deformation and temperature, offering sensor bonding services for OEMs and manufacturers. Our specialized sensors cater to predictive maintenance and harsh environments, including aquatic, high-temperature, and nuclear settings.

Ensuring Structural Integrity

As the European leader in structural integrity testing, Crouzet offers comprehensive solutions to ensure the reliability of aircraft and various components during static and flight tests.

Our global team of 15 experts provides:

Tailored Solutions:

Custom design and sizing of strain gauge-based sensors, including 5 or 6-axis balances for wind tunnel applications.

Expert Installation:

Strain gauges, accelerometers, thermocouples, and fiber optics.

Advanced Data Acquisition:

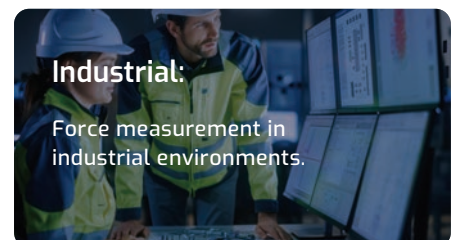

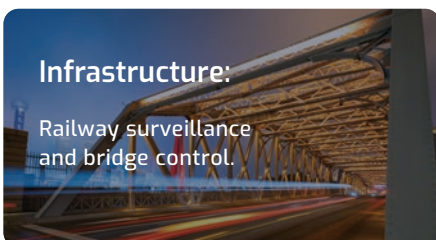

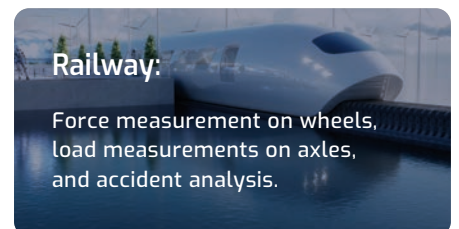

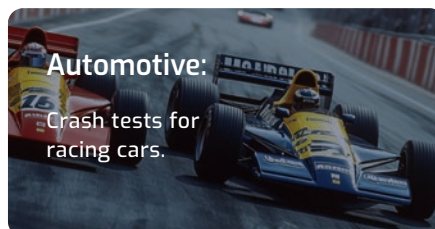

Precise data collection and real-time analysis.

Comprehensive Analysis:

Post-test analysis for accuracy and reliability.
